Professional Summary

Frontend Developer with **9+ years of self-directed learning** and **2+ years of freelance experience** building modern, responsive, and accessible web applications. Experienced in building applications using **React, Next.js, and TypeScript**, with strong fundamentals in HTML, CSS, and JavaScript. Hands-on experience developing **production-ready applications**, dashboards, authentication flows, and **REST API–driven** user interfaces. Open-source contributor to **MDN Web Docs**, with a strong focus on clean code, performance optimization, and accessibility. Actively seeking a Frontend Developer role in a product-focused team.

Technical Skills

- Zustand
- TanStack React Query
- React Hook Form
- Zod validation

Backend & APIs

- Node.js, Express.js
- RESTful APIs
- Authentication: NextAuth.js, Passport.js

Databases

- MongoDB, Mongoose
- MySQL
- PostgreSQL (Vercel)

Tooling & Quality

- Git & GitHub
- Vite, Parcel
- Prisma ORM
- Accessibility (WCAG fundamentals)
- Performance optimization
- Basic testing & automation (Selenium, Sauce Labs)

Professional Experience

Freelance Frontend Developer

Fiverr · Remote
Oct 2020 – Nov 2023

Fiverr Profile

- Delivered **40+ frontend projects** for international clients using HTML, CSS, JavaScript, and React.
- Built responsive landing pages, dashboards, and reusable UI components focused on usability and performance.
- Achieved **Level 1 Seller** status with a **5/5 client rating** and **100% on-time delivery.**
- Managed project requirements, revisions, and client communication independently.
- Worked with clients across multiple time zones and industries.

Projects

GamesLibrary *(In Progress)* - Next.js, TypeScript, Tailwind CSS, Shadcn, Framer Motion, Zustand

A full-stack web application for discovering, reviewing, and organizing video games with personalized libraries, wishlists, and stats.

- User authentication, custom game lists, wishlists, and tagging.
- Reviews with markdown, ratings, and personalized dashboards.
- Fully responsive UI and smooth animations.

[Github](#)

Issue Tracker - Next.js, TypeScript, Tailwind CSS, Radix UI, Prisma, NextAuth, MySQL

A production-ready issue tracking system with authentication and admin-ready architecture.

- Authenticated dashboard with filtering, sorting, and pagination.
- Role-based access, form validation with Zod, and API caching.
- Responsive, accessible UI with error tracking and monitoring.

[GitHub](#)

Game Hub - React, TypeScript, Zustand, React Query, Chakra UI, RAWG API

A modern video game discovery platform.

- Search, filtering, sorting, and infinite scrolling.
- Global state management and API caching.
- Light/dark mode with accessible, performant UI.

[Live Demo](#) | **[GitHub](#)**

Financial Dashboard - Next.js, TypeScript, Tailwind CSS, PostgreSQL, NextAuth

Built as part of the official Next.js learning path.

- Server Actions and data mutations and authentication.
- Search and pagination using URL parameters.
- Performance optimization and metadata handling.

[Live Demo](#) | **[GitHub](#)**

Local Library - Node.js, Express.js, MongoDB, Pug

A full-stack CRUD application for managing books and authors.

- RESTful API design with MongoDB data modeling.
- Server-side rendering and form handling.
